

PRODUCT DESCRIPTION

- » Coating thickness gauge for paint layers, varnish layers etc.
- » LCD display, with backlighting, displays all information at a glance
- » Memory functionality, statistics function

APPLICATION

- » F mode: Non-magnetic coatings on iron and steel
- » N-mode coatings on non-magnetic metals
- » Minimum thickness of base material 300µm
- » Smallest sample radius: concave: 50 mm; convex 1.5 mm
- » Zero plate and calibration foils included in the delivery
